

TracTrac Tracking Instructions for Participants

Live Tracking

The regatta can be followed live, and also in replay mode, on the internet from the event page at:

👉 https://tracrac.com/event-page/event_20250711_MuhuVina/3127

Tracking is also available in the TracTrac app (iOS and Android) for mobile devices.
([More information about how to watch via TracTrac.](#))

GPS Tracker Instructions

- A **fully charged GPS tracker unit** will be handed out **every morning** from the Race Office.
- Prior to arriving at the starting area, each yacht must **securely attach** the GPS tracker.
- The **yacht is responsible** for ensuring the tracker is correctly mounted.
- Tracking is used to estimate a **preliminary finish time** – note that this is **not the official finish time**.
- After the final race of the day, the tracker must be **returned immediately** to the Race Office.
- In case of **loss or damage**, the replacement cost amount 150 euros will be charged.

Mounting the Device

- Mount the device **centrally at the back of the boat**, well clear of other instruments or obstructions.
- It must be placed in **clear view of the sky** (for satellite signal) and **above the waterline**.
- Secure the tracker **firmly** using a cable tie or tape, so it does not hang or move around.

- The device comes in a **waterproof bag** – **do not open it** under any circumstances.
(Note: The tracker itself is **not waterproof**.)
